

# Get Dataset Path

V1.0 Documentation

## Overview

A very simple tool to retrieve the absolute path of an attached dataset and record the value to a private data key.

Useful in scenarios where an App or Configurator requires an asset, but you don't want to (or can't) store said asset in a temporary folder. Instead, pickup as a dataset and let it live along-side the job as a true side-car file.

This reduces the requirement of temporary folder locations and unnecessary file injections.

## Compatibility

Switch 2022 Spring and higher. Windows and Mac OSX

## Incoming Connections

At least one incoming connection required.

## Outgoing Connections

At least one outgoing Traffic Light connection required.

## Flow Element Properties

- Dataset: The Dataset to lookup relative to the Incoming Job.
- Key: The private data key to be created with the resulting full path to the dataset file.

## About Significans Automation

Significans Automation is a software integrator specializing in delivering next-generation automation to the Printing and Packaging industry.

We offer programming and expertise in custom workflow development, deployment of communication and project management systems, color management, and end-to-end business integration. While upholding software neutrality, Significans Automation advises and tailors best in class software to optimally fit the environment.

The level of sophistication that is provided increases profitability, improved quality control, and enhanced production efficiency, enabling Artificial Intelligence and Robotics, while also facilitating new revenue opportunities in e-commerce. We are driven by the conviction that customized automation is the only path forward.
