

Clipdrop Reimagine

Description

Clipdrop Reimagine allows you create variations of your JPG or PNG images, with similar but different content using sophisticated algorithms based on *artificial intelligence*. The app makes use of the payable REST API from [Clipdrop.co](https://clipdrop.co).

Compatibility

Switch 2022 Fall and higher.

Compatibility third-party applications

Clipdrop REST API.

Connections

This app needs one incoming and one or more outgoing connections. The incoming one should deliver a PNG or JPG image with a maximum resolution of 16 megapixels and a max file size of 30 Mb.

The Data on Success outgoing connection delivers the resulting image. If not all image specifications are met the original image is moved via the Data on Error outgoing connection.

Properties detailed info

Flow elements properties

- API key
A valid API key generated from within your [Clipdrop user account](#).
- File name suffix
An optional file name suffix which forms the name of the generated image file together with the file name of the original image.
