

CoCoCo App

Description

The CoCoCo App for Enfocus Switch allows you to seamlessly integrate powerful CoCoCo Cloud requests directly into your workflow.

With this app, you can retrieve, update, and manage data from various sources using predefined or custom queries and mutations.

Compatibility

Switch 2024 Fall and higher. Windows or Mac OSX.

Compatibility third-party applications

Requires an active and paid CoCoCo account.

Some features like "Infer Job" need a special feature enabled in your account. Please talk to us for more information.

Application discovery details

CoCoCo is a cloud-based application. You will need an API token from your CoCoCo cloud in order to access the API, but no local software other than this App is required.

Connections

At least one incoming connection and zero to unlimited outgoing connections.

Properties detailed info

Property	Description
Element Type	The flow element type: CoCoCo. This property is useful to identify renamed flow elements. It cannot be changed.
Name	The name of the flow element displayed in the canvas.
Description	A description of the flow element displayed in the canvas.
CoCoCo API Key	The unique Key that securely connects the CoCoCo App to your Switch machine. You can generate a token in the settings of your CoCoCo cloud account.

CoCoCo Domain	The domain of your CoCoCo cloud instance (e.g. sandbox.cococo.cloud).
