

# MixID

## Description

Use this app to create a UUID.

You can choose from the standard UUID, a shorter UUID or random words.

And you can define the case of the UUID. Upper case, lower case or random case.

### Use cases:

- You need to attach a UUID for a job, so you can add it to a database.
- For setting a hierarchy path for uploading to a web-server, so you cannot guess the url.
- Generate a code or password for later use in a flow.
- And lots of other uses

### Examples of output:

- FA2DC921-DEBD-4F50-B262-C95D1A72F3FA
- E529F48A-89bb-4a4a-8840-3C2edE3a90EF
- d5d03d8b-11d9-4ee6-bee8-0d74305ed58c
- F9SGKTFDW7
- KBnu4BwVb6
- fummcefoqu
- DIFFICULT\_DELFTWARE\_alumnus
- filmdom predigestion vulpine
- CONDUCT-REVEL-FASHION

## Compatibility

Switch 2022 Fall and later

## Connections

Multiple input connections to the app is allowed. Only one output connection is allowed.

### Properties detailed info

- **Type of UUID:** Choose from the 3 different kinds of unique IDs.
  - **Standard:** Standard UUID with 36 characters.
