Release notes

## New features and improvements

This release will introduce a range of new features and improvements, including:

### Sort by preflight state (v9):

#### **Node.js:**

This release contains the migration from Legacy to Node.js of the Sort by preflight state app.

#### **Warning:**

The changes in the app require re-designing the flows to leverage the newly improved features.

#### **New features:**

The new version offers more flexibility in handling the sorting of incoming PDF files. The size of this app has been significantly reduced, resulting in a quicker installation time of the default apps during the Switch installation. Furthermore, significant performance improvements, particularly job processing time, have been achieved.

- The traffic-light outgoing connections are now removed and a new outgoing connection property "Certified PDF state" is introduced. The PDF file will now follow the matching selected Certified PDF state of this property. Choose one or more combinations from the available options from the "Select many from library" editor - Success, Warnings, Sign-offs, Errors, Certified but not valid and Not certified.
- Non-certified PDF files will now be sent to the connection with the Certified PDF state "Not certified" instead of failing and ending up in Problem jobs.
- New property "Ignore modification date" is introduced. If set to Yes, the difference between the last modification date and the last preflight date is ignored. The job will be processed as Success, Warning, or Error. If set to No, if the difference exceeds 1 minute, the job will be processed as Certified but not valid.

## Export metadata (v3):

### Node.js:

This release contains the migration from Legacy to Node.js of the Export metadata app.

## Inject job (v12):

### Node.js:

This release contains the migration from Legacy to Node.js of the Inject job app.

## Webhook (v8.1):

### Bug fix:

- **ENFSWAPP-2246:** Webhook v8 attach as dataset bug.

## Rename job (v12.1):

### Bug fix:

- **ENFSWAPP-2241:** Rename Job v12 rename files inside folder error.

## Unpack job (v13.1):

### Bug fix:

- **ENFSWAPP-2296:** Unpack job: Error in restoring metadata.

## XML pickup (v13.1):

### Bug fixes:

- **ENFSWAPP-2091:** XML Pickup v3 orphan timeout = 0 bug
- **ENFSWAPP-2178:** XML Pickup
