What's new:

Color Management Settings in /pdf2image

As of PLC version 2505, it's now possible to set color management settings in the /pdf2image endpoint as in the /job (/preflight) endpoint. Please refer to documentation for more details on those properties.

Fixed bug with Azure Uploads

Azure Containers users reported an issue when PLC was working but failing to finally upload files to the Azure Containers. This is now fixed, and users can now use Azure without issues.
