Review 2445

Release notes

New features and improvements

This release includes bug fixes and the release of a Public API that allows OEM partners and customers to integrate Enfocus Review within their own workflow, MIS, or web2print platform.

Public API

The Public API currently includes:

- The entry point for all communication with the Enfocus Review app.

- A method for uploading one or more files to Enfocus Review, which returns a link that can be used to access the uploaded files.

- A method to request the status and other details of a PDF file.

- Methods to list and search the collections and files in the Enfocus Review site.

- A method to delete uploaded files.

- Methods to add, delete and list brands.

Detailed instructions on how to access the Public API as well as its documentation will be shared shortly.
