# General

## Additional languages

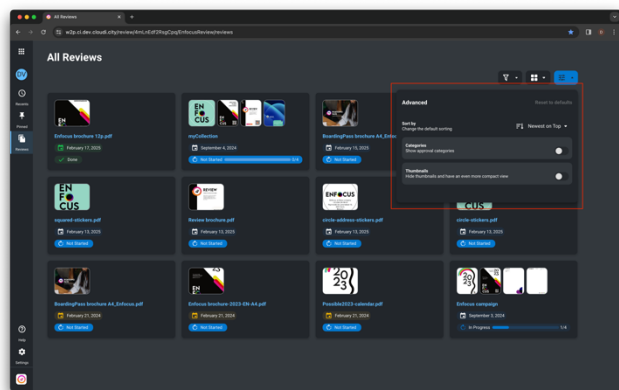

The following languages have been added to the admin, collections, and viewer environment:

- Norwegian
- Danish
- Swedish
- Estonian
- Latvian
- Lithuanian
- Finnish

# Admin

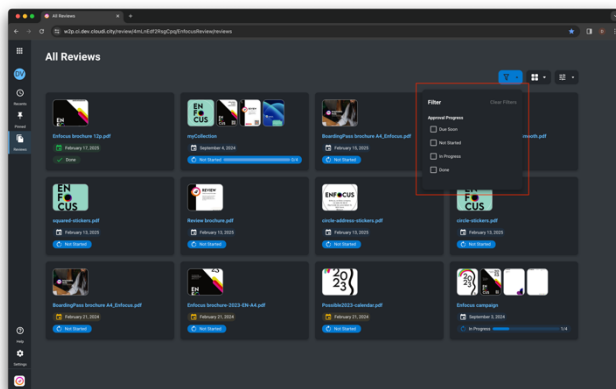

## Advanced filtering in admin

In the admin interface, users now have the capability to organize reviews either by their arrival date or alphabetically. Additionally, they can visualise the categories and toggle the visibility of thumbnails, resulting in a more compact view. [This movie](#) explains the new functionality in more detail.

## Filter options in admin

In the administrative interface, a new feature has been introduced, enabling users to conveniently filter reviews based on their current status. This enhanced filter functionality allows you to visualize reviews that are in progress, approaching their due date, not started yet, or already completed.

## Improvements

- It is now possible to use the JobID as a variable in the Post Approval Page URL.
- You are now able to use a variable multiple times in the Post Approval Page URL.

# Review Switch App

## Translation function

In the Switch Review app, additional languages have been added to the enable translation function in the outgoing connection type "Reviewed file".

## Improvement

- The Switch JobID is now forwarded to Review as well.
